

People Power!

Tell Congress: It's Time to Focus on Oneida Lake!

For the last two years, Congress let us down. They sacrificed cormorant management in New York. Despite promises to the contrary, they did nothing to restore it.

So we showed them we mean business! Today most of the legislators who ignored Oneida Lake are **former** Congressmen who lost close elections, thanks in part to the voting power of anglers and outdoors people.

Let's help our new Congress get off on the right foot.

Call your legislators today. **Politely** tell them or their staff that Oneida Lake is extremely important to you ... and that you plan to cast your next vote based on this Congress' attention to Oneida Lake issues, especially restoration of cormorant management.
